

Table 1: Performance and computational efficiency of cross-model communication between Qwen3-8B and Qwen3-14B. Arrows indicate the sender-to-receiver direction. Acc ($\uparrow$) denotes task accuracy (%), or pass@1 (%) for code generation; Dec. ($\downarrow$) denotes explicitly decoded vocabulary tokens per problem; and Time ($\downarrow$) denotes end-to-end inference time (seconds per problem). Values are reported as mean $\pm$ population standard deviation across repeats. A dash indicates an unavailable result.
